of productivity measurement systems and whether or not they should be done on a decentralized basis or on a more centralized basis. RPH's general comment was that although he saw value in such systems he did not like to see them become too elaborate or too stringent since they inevitably ended up in collection of inaccurate data. At the end of the session, RPH indicated his interest in hearing how other elements of the Center are measuring their productivity. [REDACTED] is to schedule a briefing by [REDACTED] on what LEG is doing. Following this [REDACTED] will be asked to present the PSG/RSD productivity measurement system. (9 Nov)

\* 7. Study of a CIA ADP Career Service

(AEM) met with RPH today to review the status of the Agency study of an ADP career service. He prepared a paper on this subject which pointed out that the representative of the Office of Personnel who serves on the study group is in the process of preparing a draft paper on the subject which reportedly will favor a centralized ADP career service. The [REDACTED] paper went on to point out the advantages and disadvantages of such a system. There ensued a discussion which concluded that NPIC would not be in favor of a centralized system and that we should begin to take steps to counter such a recommendation. It was agreed that Hazzard would meet with [REDACTED] and their ADP control officers to discuss this issue in an attempt to develop a DDS&T consensus on this issue. (9 Nov)

8. Support to EPA

(AEM) AEM talked to [REDACTED] by telephone today checking on the status of our request for approval to prepare a set of briefing boards for EPA. (See memo to DDS&T dated 25 October). [REDACTED] said that he had signed off on this memo and it was in the mail. AEM called [REDACTED] today to say that the briefing boards could be released.

\* 9. Sensitive Document Control

(U) AEM called [REDACTED] today and requested a copy of the report which was mentioned in a "Notes from the Director", No. 33 which stated that such a report had been produced which presented new concepts for compartmentation in codeword systems. Ward said that he had not seen a copy of this but he would make inquiries for us. (9 Nov)

\* 10. Rotational Assignment Program -- Deputy Chief, CSD

(U) AEM called [REDACTED] today to find out whether or not there had been any applicants for the Deputy Chief, CSD position which was
